

# Talkeetna Depot Restroom Facility

## PROJECT FACTS

### Project Scope

The Alaska Railroad (ARRC) plans to construct restroom facilities nearby the depot. Existing restrooms inside the Talkeetna Depot are inadequate to accommodate the number of customers and employees using the depot. Long lines form frequently during peak depot use. Faced with growing train ridership, for the last few years ARRC has rented port-a-potties to augment restroom facilities. This project would construct suitable restroom facilities approximately 20 feet from the depot to replace the port-a-potties.

### Project Benefits

- Train ridership continues to grow and the restroom addition will accommodate this growth.
- With modern plumbing and electrical systems, the 26-by-24.5-foot building will provide customers with acceptable sanitary facilities.

### Status

- Designs are complete and call for separate mens and womens facilities.
- Environmental analysis and documentation required by the National Environmental Policy Act (NEPA) were completed in spring 2009.
- Restroom construction began in fall 2009 and is expected to be completed in 2010.

### Project Cost and Funding

- The restroom facility is estimated to cost \$500,000.
- This project is 100% funded by the American Recovery and Reinvestment Act of 2009 through a grant administered by the Federal Transit Administration.

*Hundreds of passengers pass through the Talkeetna Depot daily during the busy summer season.*
